# Global References 3 areas of benchmark expertise in environmental services

Since the establishment of Veolia Group in France in 1853, Veolia has provided total environmental solutions in water, waste and energy management services to customers worldwide.

Veolia offers a unique range of expertise in the sustainable management of water resources. This expertise is backed by state-of the-art technology and covers a complete array of solutions to meet the needs of individuals and industries around the world. Veolia treats water and monitors its quality at each stage of the water cycle, from initial source withdrawal to subsequent discharge back into the natural environment.

Veolia innovates to reduce the

encourage cities and industries to

amounts extracted and to

recycle and reuse water.

### Water

Veolia specializes in the management of both liquid and solid designated and non-designated waste. Its expertise spans the entire waste life cycle, from collection to recycling, in order to recover end-products as materials and energy.

An expert in energy services, Veolia supports the economic growth of its local authority and industry clients, while also reducing the ecological footprint.

Energy efficiency, effective management of cooling and heating networks, production of green energy: just some of our unique expertise for a sustainable world.

# Veolia leads the circular economy

Present in five continents, Veolia works with industrial companies, local government authorities and their populations to ensure the optimum use of resources.

### **HYDRO-QUÉBEC**

CANADA

Cool the IT data center for 4 million customers covering 10,000 m<sup>2</sup>. Heat extracted: 1.6 to 4.5 MW in 20 years.

#### **ANTERO RESOURCES**

Treat 9,500 m³ of industrial water per day on the Doddridge gas site (West Virginia). \$150,000 saved per well.

#### **NEW ORLEANS**

Manage water and sanitation: 550,000 m³ treated per day. 30% of earnings reinvested in social projects.

#### **MONTERIA** COLOMBIA

Promote access to safe drinking water and sanitation for everyone 24/7. A reduction in losses from 70% to 25%.

#### FIBRIA HORIZONTE BRAZIL

Recycling mineral waste from a cellulose plant (3 million t per year) owned by the largest pulp manufacturer in the world.

### **KURION** USA / EUROPE / JAPAN

Treat low-level nuclear waste by means of separation and stabilization using robotic solutions for access to confined spaces.

### **DANONE** WORLD

Danone / Veolia alliance for recycling and recovering water, plastics and waste. Supporting Danone to implement its climate policy "net zero carbon emissions by 2050".

**HAMPSHIRE COUNTY** 

Recovery annually. Landfill has decreased from 85% to 10%.

**MAYO RENEWABLE** 

Manage the largest independent

which will power 68,000 homes.

biomass power plant in Ireland with

**POWER - IRELAND** 

a capacity of 42.5 MW

of electricity and heat,

**COUNCIL — UNITED KINGDOM** 

recycled, 96,200 t of compost, 38 MW of electricity and 420,000 t of non recyclable waste treated via Energy

Treat the county's waste: 157,000 t

#### **BEE POWER** BELGIUM

Produce 215 MW of electricity and 100 MW of heat in a biomass plant

in Ghent: 450,000 t of CO2 emissions avoided per year.

### **BORÅS SWEDEN**

Make this city the "zero fossil fuel" pioneer by 2025, with combined water, waste and energy solutions.

### **NESTE OIL & BOREALIS**

Produce heat and electricity from asphaltene and natural gas. 450 MWh of heat and 30 MWh of electricity per year.

### HIRAKAWA JAPAN

**BRISTOL-MAYERS SQUIBB** 

Manage utilities and services for the

occupants of 11 European industrial sites in accordance with ISO 9001, ISO

Recover and recycle industrial waste

road concrete, paving, bricks, cement,

into secondary raw materials for

coatings and adhesives.

14001 and OHSAS 18001.

**EUROPE** 

**EKO-ZEC** 

**POLAND** 

Produce 100 GWh/year of electricity with two biomass plants to power 22,000 homes. 40,000 t of CO<sub>2</sub> avoided. A partnership which associates municipalities and local

### **LIUGUO CHEMICALS** CHINA

Treat 200 m³/h of industrial water to remove ammonia and produce fertilizer for which China is the largest consumer in the world.

### SHANGHAI

Managing drinking water for 5 million people in Pudong through a 5,000 km network with a real-time 24/7 control center.

### CONOCOPHILIPS AUSTRALIA

Recycle liquids and waste from a gas terminal in Perth.

### ALTERGIS FRANCE

Expanding the energy services offering for local authorities, housing, health, the services sector and industry in

### **EUROPEAN METROPOLIS** LILLE - FRANCE

Make "smart water" for a million people, with 3 million m³ per year less taken out, an incubator for urban services, solidarity pricing and 80% local subcontractors.

### **EDG GUINEA**

Co-pilot the performance of electrical networks, develop infrastructure and enable the development of local expertises.

#### **SUR** SULTANATE OF OMAN

Extension of the desalination plant to meet the growing demand in the region: +51,000 m3 per day treated (total capacity: 131,000 m3 per day).

### Veolia Korea

With the establishment of the Korean branch in 1999, Veolia Korea provides a comprehensive range of waste, water, and energy management services designed to build the circular economy and preserve scarce raw materials. Around 1,300 employees are working at 50 sites for industrial water, municipal wastewater service, waste management and industrial energy service projects.

With our cutting-edge technologies and pioneering experiences in water, waste and energy businesses, we lead the environmental industry by providing O&M, EPC services for facilities, chemicals services and supplying consumables for water treatment.

### 1999 ~ 2007

### 1999

- Established in Korea

#### 2000

- LG/Lotte Chemical (HPC) contract

### 2001

- SK hynix contract
- Incheon Songdo-Mansu STP

#### 2004

- KKPC Rubber Yeosu contract

#### 2005

- KKPC Rubber Ulsan / KPC Yeosu contract

### 2006

- **SK hynix** contract extension

#### 2007

- KKPC Resin Ulsan contract

### 2008 ~ 2014

### 2008

- Dongbu Steel hot-rolled contract

### 2010

- Dongbu Steel cold-rolled contract

#### 2013

- **KPC II** Yeosu contract
- **DH Recycling** contract

#### 2014

- KHNP contract
- COSMO AM&T contract
- Hongwon P&P contract
- **Jeonju City** Actiflo™ STP EPC contract

### 2015 ~ 2017

### 2015

- 100% Acquisition of Ecocycle
- **Yeosu EPC** contracts awarded for Exelys<sup>™</sup> process
- SOLVAY WTP·WWTP EPC contract

### 2016

- Acquisition of **Dongyang Green Bio** food waste facility
- **Seonam** STP EPC awarded

#### 2017

- Hyundai Transis contract
- Acquisition of Uniken
- Acquisition of Hanbul Energy Management
- SK hynix(Happy More) project
- **Kleannara** water & wastewater treatment contract

### 2018 ~ Present

### 2018

- SK hynix M15 contract
- **SK hynix** contract renewal (Icheon, Cheongju)
- MagnaChip contract
- Kleannara SRF boiler contract

#### 2019

- Acquisition of Doksan & DSPL
- Acquisition of R&E

#### 2020

- LG/Lotte Chemical (HPC) contract renewal
- KKPC contract renewal (Yeosu, Ulsan)
- SK hynix M16 contract

### 2021

- **KKPC 2** Rubber Yeosu contract

# Water Management

### Total solutions for water resources

Veolia offers comprehensive services in the water resources cycle including the withdrawal of raw water, production and supply of drinking water, and the treatment and recycling of wastewater. We possess the ability to meet the needs of municipal customers as the global leader in water business. In addition, we offer services for industrial customers such as SK hynix, KG Dongbu Steel, Kumho Petrochemicals, LG/Lotte Chemical, Kleannara, etc. including the production of industrial water, operation & maintenance services of water treatment facilities.

Veolia provides total water treatment solutions customized for each industry such as oil & gas, semiconductors, pharmaceutical, automobile, power plant, chemical and paper.

### Operation and Maintenance & Wastewater

Veolia offers operation and maintenance services of water & wastewater treatment facilities for municipal and industrial customers.

Construction of new facilities, Upgrade of existing facilities

Optimization of facilities operation and maintenance

Sustainable solutions for reducing effectiveness on water contamination and CO<sub>2</sub> emission.

Expert supervision of staff

### **Water Treatment Technology**

Veolia offers more than 350 proprietary technologies to respond to issues that span the entire spectrum of water treatment, including drinking water, industrial process water, ultrapure water, wastewater and seawater:

Biological treatment: Biostyr®, MBBR

Membrane technology: microfiltration, ultrafiltration and reverse osmosis

Desalination via membrane, thermal and hybrid processes

Wastewater treatment: Evaled™, Actiflo™, Biostyr®, MBBR, Biothane®, MBR

### **EPC & Technology Solutions**

Veolia offers a total turnkey solution for both municipalities & industries ranging from design and construction of water treatment facilities and system to facility renovations.

As the global leader in water services, we make sure to deliver the best solutions for our clients to process & recycle wastewater including the recovery of energy and raw materials and reuse of sludge coming from wastewater.

Exleys<sup>™</sup>, Settled in Yeosu STP

### Chemicals

#### Hvdrex™

Customized chemical services for municipal and industrial water treatment system.

series 1000	Boiler water treatment
series 2000	Cooling system treatment
series 3000	Drinking water production
series 4000	Chemicals for RO Membrane
series <b>5000</b>	Industrial maintenance management
series 6000	Water & wastewater treatment
series <b>7000</b>	Biocide and legionella treatment
series 8000	Process and specialty chemicals
series 9000	Other advanced treatment

# Water Recycling & Reuse Solutions

Veolia's patented engineering processes provide clients with water recycling and reuse solutions.

- Actiflo®: TurboRapid, flexible and performant
- IDRAFLOT®: Leading edge biological treatment
- **EVALED™** : Evaporation technology

- MegaRO™ : Reverse osmosis Units for Boiler Feed and Process Water
- **Uflex™** : Ultrafiltration Unit / Membrane Solutions
- AnoxKaldnes™ MBBR
- : Leading edge biological treatment

# **Waste Management**

### Safe and Professional Waste Services

Veolia is an international, market-leading waste management company providing a comprehensive range of services for municipalities & industries. It anticipates and evaluates new legislation, develops and assesses environmental technologies and researches our customers' practical requirements to provide successful sustainable waste management services.

Today Veolia Korea operates material recovery facilities and Produce Solid Refuse Fuel (SRF) which is used as fuel for the Waste To Energy (WTE) it operates or for external clients

#### Hazardous waste Waste to treatment site **SECONDARY** Energy plant **RAW MATERIALS TREATMENT** Fuel, solvents, Energy/ raw materials Biogas Landfill Compost platform (Solid Refuse Fuel) & Anaerobic digestion plant Sorting of Biogas Fertilizers valorisation recyclables Plastics, wood, metal, paper Municipal Solid Waste Collection Municipal Commercial & **Solid Waste** Industrial waste Collection Hazardous waste Commercial Collection & Industrial Waste **LOGISTIC** Hazardous Waste

**SERVICES** 

### Services Offered by the Waste Business Unit of Veolia Korea

### **Materials Recovery**

The recovery of materials helps conserve primary natural resources by turning waste into replacement energy products. Veolia has been developing recovery solutions that provide its customers with certified secondary raw materials.

- Plastics: Sorting by type (PET/PP/PS/PE)
- Recovery and production of secondary raw materials
- Production of recycled materials

### **Waste-to-Energy**

Veolia supports the growing demand for renewable energy and, wherever possible, develops solutions to supply green energy to its customers.

- Electricity and heat generation for the local industry or domestic needs produced by the combustion of non-recyclable waste
- **SRF recovery:** solid recovered fuel (SRF) provides a way to recover of municipal waste or non-hazardous industrial waste while meeting industry's growing demand for energy

13

By operating such facilities, Veolia develops the circular economy. Veolia will continue to intensify its development in such activities allowing the reduction of greenhouse gas emission and limiting the use of the primary resources.

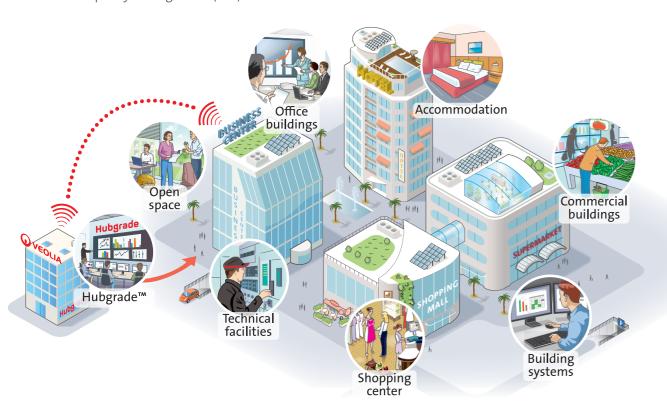

Veolia can provide different solutions to reuse, recycle, valorize or treat waste by developing and implementing dedicated solutions in other fields of the waste management including:

- Collecting, producing of recycled materials
- Organic, designated, medical or radioactive waste activities
- Waste to Energy & incineration
- Landfill
- Industrial services(IS): tank cleaning service, soil remediation.

# **Energy Management**

Veolia offers both economical and eco-friendly optimization services of energy management system for municipal and industrial clients. Veolia improves the business performances of clients by providing these services such as heating and cooling network management, combined heat & power (cogeneration) and building energy performance improvement.

- Management of energy utility service
- Managing energy supplies for industrial clients
- Energy efficiency improvement
- Renewable energy management
- Designing, building, operating and managing of CHP, biomass, and energy utilities.
- Creating environmental solutions including biomass, biogas, energy recovery and CHP
- Managing carbon quotas
- Building energy services (BES)
- Inside air quality management (IAQ)

#### Performance

- Energy, water and cost savings
- Carbon emission reduction
- Green certifications: LEED, BREEAM, ISO 50001 ...

#### **Secure Energy Supply**

- Cost of utilities
- Efficiency of energy systems

### Reliability

- 24/7 Energy
- Quality of utilities
- Fixed cost of O&M

### **Energy Plant Management**

### **Combined Heat & Power (CHP)**

CHP plants produce recyclable heat along with electricity, which is most commonly used for heating and industrial processes.

- Incineration using boilers
- Waste to energy
- District heating

### **Value for Customers**

### Veolia's operation and maintenance

### Real-time energy consumption report

Hubgrade Solution provides the real-time report through the real-time performance monitoring

### Optimization of wastes

Optimization of waste management cost and reduction of emission through waste to energy solution ex) Medical waste etc

Optimization of energy consumption and production, increase of efficiency

### Water circulation management

Cost optimization, recycling and securing of supply through management of water usage, process ex) condensate water management etc

### Performance improvement

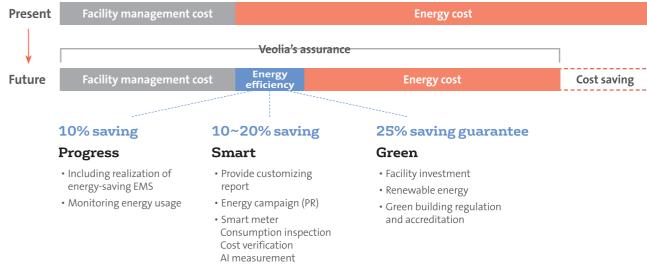

Performance based contract system, improvement of measuring and management capabilities

### Recovery of resources, Waste To Energy

Added value enhancement through recycling and recovery ex) waste heat supply etc

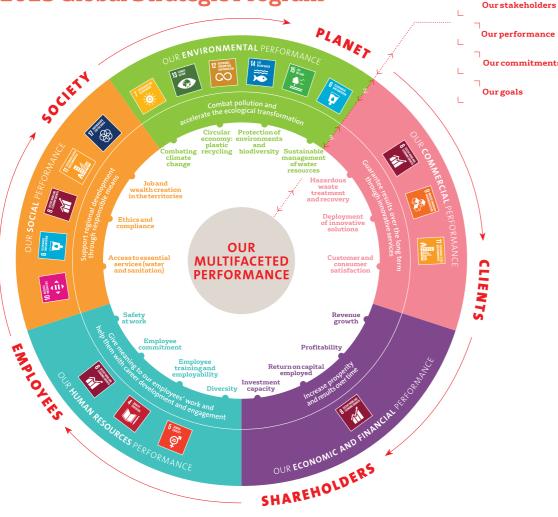

### **Energy saving guarantee contract**

# Corporate Social Responsibility & Sustainable Development

Protection of resources is now one of major challenges facing our society to leaving precious resources intact for the next generation. Veolia works toward these goals by consistently providing comprehensive environmental solutions with our clients and conducting CSR activities at the corporate level.

Impact 2023 Global Strategic Program

### UN Sustainable Development Goals (SDGs)

Veolia plays a part in all 17 SDGs at different levels and has a direct impact in 13 of them.

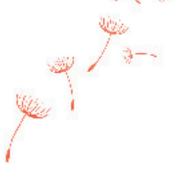

### **Local Activities**

Local community initiative

Clean-up campaigns

Site tours

### The Veolia Foundation

Established in 2004, the Veolia Foundation supports non-profit general interest actions in France and abroad that contribute to the sustainable development of the territories.

**1.500** projects supported since its creation

200 humanitarian and development assistance missions

17

### **Certificates**

Integrated Management Systems (IMS)

Veolia implements the Integrated Management System (IMS) on all sites. The 3 main categories of this system are service quality, health and safety policy and environmental performance. Currently, Veolia sites including Seoul head office achieved triple certification to ISO 9001: 2015, ISO 14001:2015 and ISO 45001:2018.

# Veolia Asia Industrial Technical & Training Center (ITTC)

### Veolia Global Research Network

#### Researchers

and technicians from 800 experts within the Group

Over 2,100

patents field

### Water, Waste, Energy

research programs aligned with the Group's businesses

expertise departments

### Introduction

- Year of establishment: 2013
- Location: Incheon Free Economic Zone (IFEZ) Songdo Area Veolia Asia's Industrial Training and Technical Center (ITTC) offers Veolia employees across the Asia Pacific regions advanced educational training programs targeted to the subject of technical expertise, research trends, best practices, management, finance, and project development. The environmental friendly design of the training center accommodates 30,000 employees throughout the year, equipped with a pilot plant, central laboratory, and training rooms showcasing Veolia's expertise in the water, waste and energy activities.

### **Educational Facilities**

The training Center at ITTC is designed to enhance employees' professional competences in the area of technical, management, general subjects and functional areas which will contribute to improvement of business operations.

#### **Pilot Plant Hall**

The hall is equipped with in-house instruments for conducting a pilot test of multiple items, such as production of water with different quality ranging from raw to ultra-pure, wastewater reuse, optimal use of chemicals and smart operation of cooling

### **Central Laboratory**

As an independent, certified institution, the Central Laboratory offers not only the technical support for water treatment systems & process enhancement but also education programs for proper analysis.

### Hubgrade™

Hubgrade<sup>™</sup> is an energy saving operating system developed by Veolia with it's own know how. Continuously provides efficient energy management and strategy.
